

NEWS RELEASE

Mariposa Superior Court To Update Its Computer System

August 2020

**SUPERIOR COURT OF
CALIFORNIA
COUNTY OF MARIPOSA**
5088 Bullion Street
Post Office Box 316
Mariposa, CA 95338
www.mariposacourt.org

209-966-2005

Honorable F. Dana Walton
Presiding Judge

Honorable Michael Fagalde
Assistant Presiding Judge

Cynthia J. Busse
Court Executive Officer

Mariposa Superior Court is pleased to announce that Tyler Technologies, Inc. (Odyssey) has been selected as the vendor for the court's new Case Management System (CMS).

On September 21, 2017 The Judicial Council on behalf of the Superior Courts of California solicited a request for proposal for a new CMS (RFP #TCAS-2017-05-JU).

On February 5, 2018 Tyler was one of four vendors that was issued a notice of intent to award to enter into a Master Service Agreement (MSA) for Court Case Management Systems.

In September 2018 the Judicial Council of California submitted a Budget Change Proposal (BCP #0250-101-BCP-2019-GB) for funding to assist ten trial courts with replacing their legacy CMS.

Together, the Judicial Council of California and Tyler Technologies, signed a Master Services Agreement commencing March 1, 2019 and expiring February 28, 2024 with an option to extend (MSA #MA-2017-13).

In the Budget Act of 2019, the governor approved and signed into law the budget change allowing funding to be distributed for the Mariposa Superior Court CMS. On October 15, 2019 the Judicial Council and the Court Executive Officer signed an Intra-Branch Agreement (IBA-44060) awarding the funding to the Mariposa Superior Court.

After several product demonstrations and much deliberation, Tyler Technologies' Odyssey was selected as the product that would best match the needs of the Mariposa Superior Court. On June 17, 2020 the Court Executive Officer and Tyler finalized and executed the participation addendum.

Since 1999, Mariposa Superior Court has been operating on a mainframe system that is unable to provide necessary data sharing for the court system and keep up with current technologies and efficiencies. Additional applications and products had to be developed over the years to supplement new processes they are becoming outdated and will not be supported in the near future. The new web browser-based system is more configurable, and the court can design the CMS to meet the courts needs now and into the future.

Information will be more accessible to the public, and individuals will be able to obtain data and documents from their homes and offices, and no longer have to travel to the courthouse for basic services. The new CMS will not only increase accessibility it will increase efficiencies of court services. The targeted go live date is 2022.
